

Malaysia Statutory Tax-Change Dataset

Identified tax shocks (CIT / PIT / consumption) with motivation and exogeneity

1 Purpose

This is the deployment deliverable: the bound, classified dataset of **statutory tax changes** for Malaysia, produced by the per-instrument identification skills (`/identify-cit`, `/identify-pit`, `/identify-vat`) and the `/identify-tax-shocks` orchestrator. Each row is one narratively-announced act × tax type, carrying the identified rate change (Vegh & Vuletin 2015-style), plus a motivation label and an exogenous/endogenous read from the validated C2b codebook.

The dataset is built to be sent to a human expert for validation. Following the project's narrative-identification discipline, the exogeneity columns are **preliminary inputs requiring adjudication, not findings**: the deliverable keeps both Claude's narrative read (`exogenous_preliminary`) and C2b's classification (`c2b_exogenous`) side by side, and Section 5 flags where they differ.

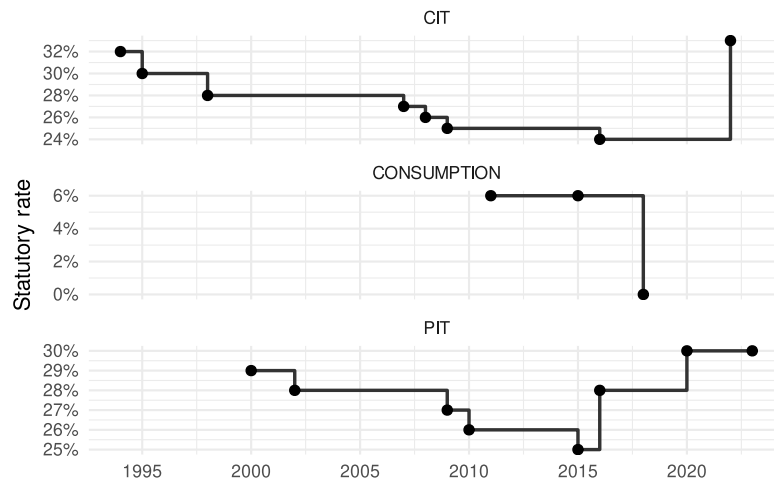

2 Statutory tax-change inventory

Table 1: **Statutory tax-change inventory.** One row per announced act $\times$ tax type. [App](#) is the change in the headline statutory rate; motivation and exogeneity are from the validated C2b codebook (v0.9.1). The preliminary narrative exogeneity read is shown for comparison and is pending expert adjudication.

Shock	Act	Tax	Direction	Δ pp	Effective	Motivation	Exo. (C2b)	Exo. (prelim)
MY-CIT-01	Corporate income tax rate reduction 34% to 32% (early-1990s Budget)	CIT	Cut	-2	1994	Long-run	TRUE	ambiguous
MY-CIT-02	Corporate income tax rate reduction 32% to 30% (mid-1990s Budget)	CIT	Cut	-2	1995	Long-run	TRUE	ambiguous
MY-CIT-03	Corporate income tax rate reduction 30% to 28% (Budget)	CIT	Cut	-2	1998	Countercyclical	FALSE	TRUE
MY-CIT-04	Corporate income tax rate reduction 28% to 26% (Budget)	CIT	Cut	-2	2001	Countercyclical	FALSE	TRUE
MY-CIT-05	Corporate income tax rate reduction 26% to 24% (Budget)	CIT	Cut	-2	2003	Countercyclical	FALSE	TRUE

3 Rate paths

Figure 1: **Statutory rate paths by tax type.** Step path of the headline statutory rate implied by the identified rate-bearing shocks, faceted by tax type. Non-rate shocks (e.g. one-off levies, regime introductions without a standing rate) are omitted from the path.

4 Timeline

Figure 2: **Tax-change timeline.** Acts counted per year $\times$ tax type $\times$ motivation $\times$ direction as a diverging stacked bar: hikes grow the bar upward, cuts downward, neutral acts sit at the baseline. Colour = C2b motivation. Faceted by tax type.

5 Where the preliminary read and C2b disagree

The cases where Claude's preliminary narrative read and C2b's classification diverge are the priority for expert adjudication — they are the methodologically consequential calls, not noise.

Table 2: **Exogeneity disagreements.** Shocks where the preliminary narrative read and the C2b exogenous/endogenous classification differ. These are the priority cases for expert adjudication.

Shock	Act	Tax	Exo. (pre-lim)	Exo. (C2b)	Motivation (C2b)
MY-CIT-03	Corporate income tax rate reduction 30% to 28% (Budget 1998)	CIT	TRUE	FALSE	Counter-cyclical
MY-CIT-09	Cukai Makmur one-off prosperity tax surcharge (Budget 2022)	CIT	FALSE	TRUE	Deficit-driven
MY-CON-SUMP-TION-01	Service tax rate increase 5% to 6% (Budget 2011)	CON-SUMP-TION	FALSE	TRUE	Deficit-driven
MY-PIT-01	Across-the-board individual income tax cut 1pp (Budget 2000)	PIT	FALSE	TRUE	Long-run
