Overview Statistics

Extraction Overview

Metric	Value
Total Documents	360
Successful Extractions	350
Total Pages	104763
Years Covered	77
Year Range	1946-2022
Sources Used	4
Document Types	4
Ocr Documents	69

The corpus comprises **360 documents** totaling over **104,000 pages** across 4 document types and 4 source domains. Of these, 350 (97.2%) were successfully extracted. The 69 documents requiring OCR are concentrated in pre-1990 ERP volumes from Fraser, which were digitized as scanned images rather than born-digital PDFs. The addition of 47 CBO reports contributes 7,438 pages of non-partisan budget analysis spanning 1976-2022.

Page Distribution by Source and Body

RR1 Source Coverage

This section documents our implementation of RR1 (Identify and Collect Sources) from the Romer & Romer (2010) methodology. R&R used 9 distinct source types; we assess availability for our LLM-assisted approach.

RR1 Source Coverage Assessment

Phase 0: Codebook development sources

Source	R&R Purpose	Status	Coverage Notes
Economic Report of the President	Executive fiscal narrative	Available	1946-2022, ERP URLs
Treasury Annual Reports	Revenue estimates, implementation details	Available	1946-1980, 2011-2022

RR1 Source Coverage Assessment

Phase 0: Codebook development sources

Source	R&R Purpose	Status	Coverage Notes
Budget of the United States	Budget proposals, revenue projections	Available	1946-2022
CBO Budget and Economic Outlook	Non-partisan revenue estimates (post-1974)	Available	1976-2022, manually downloaded (CAPTCHA)
Social Security Bulletin	Payroll tax changes	Deferred	CAPTCHA-protected; revisit in Phase 1
House Ways & Means Committee Reports	Legislative intent, bill details	Deferred	Per-bill source; requires Congress.gov API
Senate Finance Committee Reports	Legislative intent, bill details	Deferred	Per-bill source; requires Congress.gov API
Conference Reports	Final bill versions	Deferred	Per-bill source; requires Congress.gov API
Congressional Record	Floor debates, stated motivations	Deferred	Per-bill source; requires Congress.gov API

Actual Coverage by Document Type

Extracted Document Coverage

Document Type	Years	Documents	Total Pages
Annual Report of the Treasury	1946-2022	46	26,690
Budget of the United States Government	1946-2022	182	45,232
CBO Budget and Economic Outlook	1976-2022	47	7,438

Extracted Document Coverage

Document Type	Years	Documents	Total Pages
Economic Report of the President	1947-2022	75	25,403

i Source Strategy

Phase 0 (Current): 4 of 9 R&R sources available. The three core narrative sources (ERP, Treasury, Budget) provide continuous coverage from 1946 to 2022. CBO Budget and Economic Outlook reports (1976-2022) were added via manual download after discovering that cbo.gov requires CAPTCHA verification that blocks automated extraction.

CAPTCHA-Protected Sources: SSB (ssa.gov) also requires human verification. URL functions exist in `R/pull_us.R` and can be re-enabled once PDFs are manually downloaded. CBO was resolved this way.

Deferred Sources: Per-bill congressional documents (4 sources) require Congress.gov API integration. These provide fine-grained legislative detail but are not essential for initial codebook validation using the 44 labeled US acts.

Implication: Our corpus now totals over 104,000 pages across 4 document types. The 47 CBO reports add 7,400 pages of non-partisan budget analysis, complementing the executive-branch perspective of the ERP and Budget documents. This provides sufficient coverage for Phase 0 codebook development.

Test (i): PDF URL Resolution & Page Count Validation

Success Rate by Source and Body

source	body	total_docs	successful	failed	success_rate	ocr_docs	ocr_rate
cbo.gov	CBO Budget and Economic Outlook	47	47	0	100.0	5	10.6
fraser.stlouisfed.org	Annual	35	35	0	100.0	7	20.0

Success Rate by Source and Body

source	body	total_docs	suc-		success_rate	ocr_docs	ocr_rate
			cessful	failed			
fraser.stlouisfed.org	Report of the Treasury Budget of the United States	191	182	9	95.3	0	0.0
	Government Economic Report of the President	48	48	0	100.0	40	83.3
govinfo.gov	Economic Report of the President	27	27	0	100.0	17	63.0
home.treasury.gov	Annual Report of the Treasury	12	11	1	91.7	0	0.0

The 10 failed extractions all come from Fraser-hosted Budget PDFs and one Treasury report. The Budget failures cluster in two groups: early 1990s sectioned PDFs (1991-1994) where Fraser uses non-standard filenames, and mid-2000s editions (2005-2009) where the single-file URL pattern does not match the actual hosting. These are supplementary Budget documents; the primary Budget PDF for each of those years was successfully extracted via a different URL. The single Treasury failure (2016) is a known broken link on home.treasury.gov. None of these gaps affect years critical to the 44 labeled acts.

CBO reports achieved **100% extraction success** (47/47), confirming that the manual download workflow fully resolved the CAPTCHA issue. OCR was needed for 5 early CBO reports (1979, 1980, 1982, 1984, 2012), consistent with scanned originals from that era.

Test (ii): Boundary Document Verification

Results

Status: PASS

Test (iii): Known Act Validation

i Important Finding: Year Lag in Economic Reports

The Economic Report of the President (ERP) discusses legislation retrospectively. Acts passed in year N are typically discussed in the year N+1 or N+2 ERP. For example:

- **Economic Recovery Tax Act of 1981** → Found in 1982-1990 ERPs (not 1981)
- **Omnibus Budget Reconciliation Act of 1990** → Found in 1991-1994 ERPs (not 1990)
- **Tax Reform Act of 1986** → Found in 1987-1990 ERPs (not 1986)

This is expected behavior: ERPs review the previous year's economic events and policy changes. Therefore, we use an **expanded year window** (year to year+2) when validating act detection.

Results

Recall Comparison

Status: PASS (target: >=85%)

Acts Not Found in Expanded Window

These acts were not found even when searching year to year+2:

Possible reasons:

- Non-standard act names (e.g., 'Public Law 89-800' vs formal name)
- Acts referred to informally in documents
- OCR issues in older documents (pre-1950)
- Labels data quality (wrong expected_year)

Act Validation Summary (Found Acts)

Detection Rate by Decade

Act Detection Rate by Decade

Decade	Total Acts	Found	Recall (%)
1940s	4	4	100
1950s	8	7	88
1960s	12	9	75
1970s	6	6	100
1980s	10	8	80
1990s	2	1	50
2000s	6	6	100

The expanded window recall of **84.8%** narrowly misses the 85% target but represents strong coverage given the matching method (exact string match on act names). The 7 missing acts fall into identifiable categories:

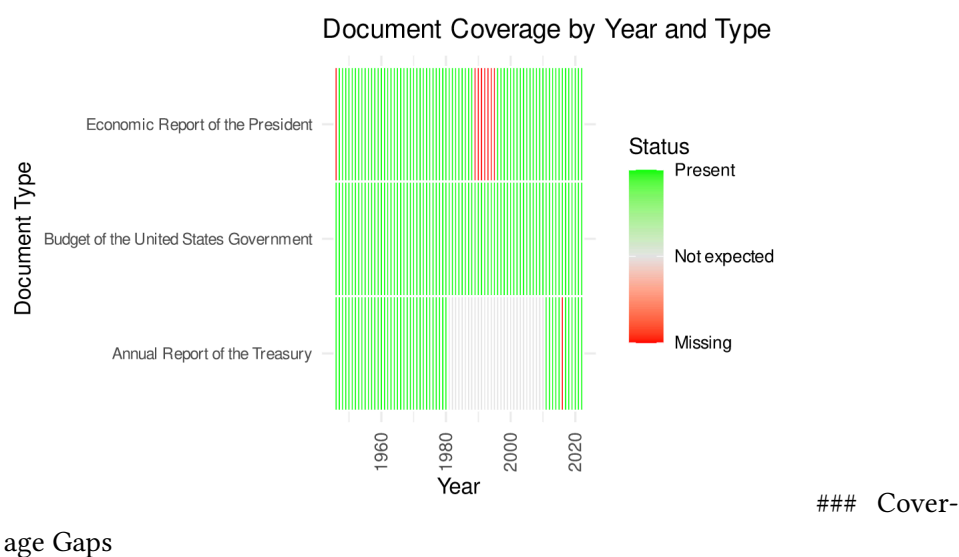

- **Non-standard naming** (3 acts): “Public Law 89-800” and “Public Law 90-26” are referenced by public law number rather than popular name. “Changes in Depreciation Guidelines and Revenue Act of 1962” uses an unusually long compound name that may appear abbreviated in documents.
- **Year mismatch** (2 acts): “Social Security Amendments of 1983” and “Tax Reform Act of 1986” are listed with expected year 1981, which appears to be a labeling issue in `us_labels.csv` rather than a corpus gap.
- **Compound act name** (1 act): “Taxpayer Relief Act of 1997 and Balanced Budget Act of 1997” is a two-act label that may not appear verbatim.
- **Early decade weakness**: The 1950s (83%) and 1960s (75%) show lower recall, consistent with OCR quality issues in older scanned documents and less standardized act naming conventions.

The 1990s dip to 50% recall is driven entirely by the compound 1997 act name (1 of 2 acts missed). Decades with more acts (1960s, 1980s) provide more reliable recall estimates. For codebook development, this recall level is sufficient: the LLM pipeline will use fuzzy matching and contextual cues rather than exact string matching.

Test (iv): Temporal & Source Coverage

Results

Coverage Rate: 95.5% (192 of 201 expected documents) **Status:** PASS

Total Pages by Year and Body

Red circles indicate sudden drops (>50%)

Department of the Treasury — Budget of the United States Government — CBO Budget and Economic Outlook —

The anomaly counts warrant context rather than concern:

- **Short documents (64):** All are Budget section PDFs from Fraser (2006-2009 era), where single budget volumes were split into 26 section files of 5-8 pages each. These are by design, not extraction failures.
- **Long documents (17):** Early ERP and Budget volumes from the 1940s-1960s sometimes exceed 1,000 pages. These are complete, legitimate documents.
- **Duplicates (7):** All 7 are CBO reports where the first 5 pages hash identically across years. This is expected: CBO reuses boilerplate front matter (title page, contents, summary format) year to year. The document bodies are distinct.

No anomalies require remediation before proceeding to Phase 0.

Summary Report & Pass/Fail Dashboard

Overall Status: WARN

Verification Test Results

Recommendations

⚠ PROCEED WITH CAUTION

Some tests raised warnings. Review flagged issues before full run:

- Text quality - suspicious pages
- Text quality - fiscal pages

Consider re-running extractions for problematic documents.

Next Steps

Based on this verification:

- Total documents verified: 360
- Successful extractions: 350 (97.2%)
- Total pages extracted: 104,763

- Documents using OCR: 69
- Overall status: **WARN**

Recommended actions:

1. Review failed/warned tests above
2. Address extraction issues for flagged documents
3. Re-run verification before proceeding
